

Reliant II

Premium Stadium Turf Rye

Reliant II is designed to bring the turf manager the best of both worlds. Mid dark green and extremely dense, Reliant II has the appearance of an American bred cultivar, but add to this the NZ component of the breeding and you gain winter activity and recovery. Reliant II is your first choice for premier or sand fields. *“The best of both worlds”*

Uses

- Spring and Autumn undersowing
- Stadiums
- Municipal Sportsfields
- Cricket Blocks
- Golf Fairways and Tees

Agronomic characteristics

- Good seedling vigour for rapid establishment
- Reliant II has proven performance in the field through seasons
- Bred for “all season” performance
- Reliant II forms a fine dense sward, is medium to dark green with strong dwarf characteristics making this grass ideal for high performance areas.
- Demonstrates low susceptibility to rust
- High Endophyte

Seeding rates

- 30g/m² to 50g/m²
- 300kg/ha to 500kg/ha
