**GENERAL INSTRUCTIONS
INSECTICIDE RESISTANCE WARNING****GROUP 2C INSECTICIDE**

For insecticide resistance management, Nufarm Gard Insecticide is a Group 2C insecticide. Some naturally occurring insect biotypes resistant to Gard and other Group 2C insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Gard or other Group 2C insecticides are used repeatedly. The effectiveness of Gard on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Nufarm Australia Ltd accepts no liability for any losses that may result from the failure of Gard to control resistant insects. Gard may be subject to specific resistance management strategies. For further information contact your local supplier, Nufarm representative or local agricultural department agronomist.

APPLICATION
