

MP SIX IRON

20-0-16 + 6Fe
220 SGN

UNIQUE FEATURES

- Unique triple nitrogen source of urea, ammonium, and controlled-release AccuBlu™ for immediately available nutrient uptake that transitions into steady, extended growth.
- Contains 6% organic iron sucrate, providing enhanced absorption for a deeper, richer, and longer-lasting turf colour.
- Delivers an effective initial green-up without causing surge growth.
- High in potassium (16%), ideal for strong roots, drought tolerance, and enhanced plant resilience under stress.

TECHNOLOGY

MP SIX IRON is designed for fairway, sports field and amenity turf fertilizer. MP SIX IRON contains AccuBlu™ is a controlled-release nitrogen technology designed to deliver a consistent and precise nutrient supply from day one, lasting up to 70 days. Its patented sealant coating ensures steady nitrogen release without the delays typical of other PCU brands, while protecting against leaching, volatilisation, and burn risk. With AccuBlu™, you get superior performance, ensuring optimal nutrient delivery at the right time, in the right place, and at the right rate.

USE PATTERNS

MP SIX IRON can be applied as a maintenance fertiliser throughout the season. Apply MP SIX IRON at 200 to 300kg/ha for maintenance feeding.

GUARANTEED ANALYSIS

Nitrogen (N)	20%
(Urea Nitrogen 16.4%)	
(Ammoniacal Nitrogen 3.6%)	
Potassium (K)	16%
Sulphur (S)	4.1%
Iron (Fe)	6%
Zinc (Zn)	0.14%

APPLICATION RATES

200 to 300 kg/ha
or 2 to 3 kg/100m²

SPREADER SETTINGS

	2 kg/100 m ²	3 kg/100 m ²
Accupro	L 1/2	N 1/2
Lesco	E or 12	F or 14
Prizelawn	J	M
Earthway	14 1/2	16 1/2

The spreader settings are close approximations. Trial calibration is recommended before widespread use.
